>GOLD REVALUATION

You know what this means? It means an inspection of Fort Knox. It's not about evaluating the gold reserves, it's about allowing inspectors in the "Gold Bullion" depository.

When Epstein's island was raided by Miami police they found hidden cameras and a massive archive of footage used for blackmail, the footage included the serving Prime Minister of the UK Tony Blair and Prince Andrew, Bill Clinton and countless VIPs. Court papers prove it and they determined that it was a blackmail operation.

That archive was seized from the police by an intelligence agency and sent somewhere, where do you think that is? Where do you think all of the blackmail footage held on politicians is stored?

Do you think those tanks and attack helicopters at Fort Knox are to defend against bank robbers? It's to defend against a domestic military force.

You're either medically stupid or trying to deflect. I'm saying the reason Fort Knox visits are so convoluted has nothing to do with the gold reserves, it's to do with what's stored in the other vaults and preventing a situation where an inspector even asks "what's in that vault" by planning the tour, probably blindfolding them for 'security reasons' and showing them the gold and blindfolding them on the way out and probably involves arguments on agreeing to a blindfolded tour.

Putin has no problem seeing Russia's gold stockpiles.

"Russia-China combined gold reserves could shake US dominance in global economy - expert tells RT"
Published time: 8 Jan, 2018
The gold accumulated by China and Russia could be seen as part of a strategy to move away from international trade denominated in US dollars,
according to Singapore’s BullionStar precious metals expert Ronan Manly.
Manly exclusively told RT that there is a shift occurring regarding the two countries building up their gold reserves,
to perhaps returning to gold-backed currencies in the future and a move away from the global dominance of the US dollar, which is no longer supported by gold.

Trump pretended to love Israel Jerusalem for the embassy blah blah blah. Now he's gonna fuck them.

Trump doesn't strike me as the type of guy who has tolerance for Jews. But probably pretended he liked them to get ahead

Yes I agree BUT I think the US or some of these banks like JP Morgan have been stockpiling silver.

Silver to gold ratio is an outrageous 80-1 right now when it's historically 16-1 since that's the ratio it comes out of the earths crust.

So there will probably be an agreement on a clean reset. China and Russia get a gold revaluation much higher with the agreement that silver to gold ratio goes back to 16-1 so the United States gets re-capitalized.

Gold at say 25k per ounce and silver at $1,300 or whatever.

We all know JP Morgan has been stockpiling millions of ounces of silver. Maybe trump takes it from them or something

Here's the sick thing. I shill biz on gold and silver and they are mostly against it.... and I tell them. You idiots don't need 100k worth of silver to cover 100k in the bank.

I tell them.... a silver piece the size of a silver dime used to be a days wage for most of human history and even in America a long time ago. And even today in underdeveloped countries the fiat value of their earnings might only equal 2 ounces of silver a month which is in line with economic reality.

So basically.... every ounce of silver you buy right now for 15$ is equal to two weeks worth of wages historically. So a measly 500 ounce silver purchase will literally equal 20 years worth of days wages when this inflationary fiat crap implodes. And it'll actually probably be 2-3x that because there's billions more people on the planet and much less silver available.

You'll probably be able to buy a small town with 500 ounces of silver.

The literal primary function of money is to MEASURE VALUE for goods exchanged for it. Nothing measures value like gold and silver.

100 years ago 20$ = a good weekly salary. 20$ was convertible into 1 ounce of gold back then

Today 20$ barely buys you lunch for two at Taco Bell.... but that gold ounce exchanged for fiat still.equals a good weekly salary.

I never really disagreed with you, but other than its scarcity the other reasons it became a money that you alluded to mostly had to do with coinage. We'd be trading paper that has a value tied to what is inside of vaults. Scarcity, malleability, low melting point, and looking cool is why people assigned it value. It was much better than bartering because you didn't have to find someone looking for a goat in order to buy a few chickens.

It's important to have gold before the revaluation not after.

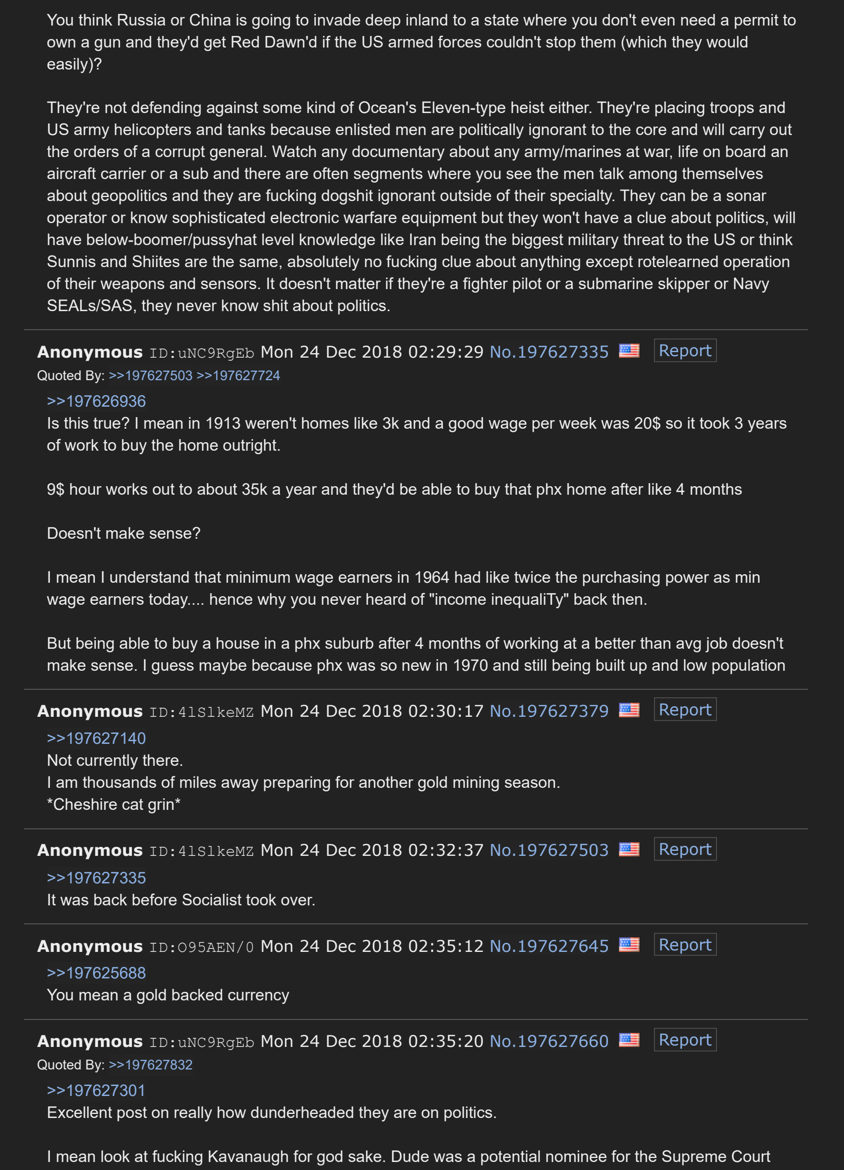
Why the fuck would you need thousands of tanks and apache helicopters to defend gold bars?



You think Russia or China is going to invade deep inland to a state where you don't even need a permit to own a gun and they'd get Red Dawn'd if the US armed forces couldn't stop them (which they would easily)?

They're not defending against some kind of Ocean's Eleven-type heist either. They're placing troops and US army helicopters and tanks because enlisted men are politically ignorant to the core and will carry out the orders of a corrupt general. Watch any documentary about any army/marines at war, life on board an aircraft carrier or a sub and there are often segments where you see the men talk among themselves about geopolitics and they are fucking dogshit ignorant outside of their specialty. They can be a sonar operator or know sophisticated electronic warfare equipment but they won't have a clue about politics, will have below-boomer/pussyhat level knowledge like Iran being the biggest military threat to the US or think Sunnis and Shiites are the same, absolutely no fucking clue about anything except rotelearned operation of their weapons and sensors. It doesn't matter if they're a fighter pilot or a submarine skipper or Navy SEALs/SAS, they never know shit about politics.

9$ hour works out to about 35k a year and they'd be able to buy that phx home after like 4 months

Doesn't make sense?

I mean I understand that minimum wage earners in 1964 had like twice the purchasing power as min wage earners today.... hence why you never heard of "income inequaliTy" back then.

But being able to buy a house in a phx suburb after 4 months of working at a better than avg job doesn't make sense. I guess maybe because phx was so new in 1970 and still being built up and low population

It mentions about the unlikely threat from Hitler bombing the gold reserves in a pre-nuclear world. If a nuclear power, the only kind of power with the ability to strike the US actually attacked the US mainland the gold wouldn't be worth shit nor would the dollar because it would be done with nuclear weapons.

Thousands of tanks, apache helicopters and the sheer amount of troops there are not to defend against some kind of terror attack either, it's to defend against a military force and that is NOT Russia or China - it's to defend against a US military force from breaching the vaults. Not because of them seizing the gold but to stop them transmitting the footage and photos in the archive.

If you don't know about 'domestic intelligence' and SEXINT you need to do your research. If you still can't understand the concept and say "Wahhh? Durr that doesn't make sense" you've got boomer/pussyhatitis and your brain is fucked.

The report by the US Customs/police investigation of 1987 on the CIA trafficking children and the Epstein island raid and discovery of the hidden camera archive and the fact no prosecutions were made of the politicians and elites proves that the whole "elite pedophile ring" phenomenon is a blackmail mechanism for intelligence agencies to affect policy.

The security at Fort Knox and the claimed reasons for the security makes it an extremely likely candidate for where the camerasnare footage is stored. That's just United States SEXINT blackmail puppet activities, during the 1971 London Baker Street raid on Lloyds bank the robbers found pictures of a frontbench MP and member of the Tory government raping children, they were retarded like most people and thought it was for the MP's personal amusement and threw the photographs on the floor for the police to find not realizing Special Branch and MI5 was on the scene right away because they were using the vault to store blackmail photos and it was covered up.

The reason for the ridiculous security at Fort Knox is NOT to protect the gold bars and I know damn well what the most important thing, much more valuable than gold, is to the powers that be and that's leverage on people who own total fucking empires. It's not to protect against foreign armies or heists, it's to protect against a rogue president ordering an armed force to retrieve the archives.

Any other explanation comes from people who have no powers of deduction. I'm not implying the army personnel know anything about a conspiracy because they don't need to. They don't get suspicious or question orders to fire Tomahawks and JASSMs when Trump orders 50 pullouts of Syria and Assad gasses conveniently women and children 50 times. They're young and dumb.

Only the general at Fort Knox has to know what's up and say "The rogue president is stealing our gold!!!!1" and those acne craterfaces will just say yes sir and open fire on JSOC or whoever the fuck.

No. Clueless soldiers and a corrupt general of the HRC. You can see what the ORBAT of any confrontation at Fort Knox would be and deduce what the nature of the attack they're expecting is. It's a full scale military assault, a thousand miles deep inland in the CONUS so not a foreign power and not terrorism or heists.

Blind faith boomery on the right and estrogen jamming deduction powers on the left is why there is so little understanding of even SEXINT and intelligence agency blackmail let alone why people don't get that Fort Knox's declared purpose is bullshit.

Because a for most of human history and even in America a couple hundred years ago a silver piece the size of a silver dime was a days wage. Even today in much of the underdeveloped world the fiat value of their pay for a month only equals 2-3 ounces of silver.

In USD 2-3 ounces of silver equals 45$. 45$ buys you 2 large pizzas. So that just proves all how absolutely ass raped we are getting by inflation and when this inflationary fiat house of debt cards comes crashing down that's what it's going to return too.

So for every 15$ you spend on an ounce of silver historically equals about 2 weeks worth of wages. So you go out tomorrow and buy 500 ounces for a measly 8k.... you literally gave 20 years worTh of days wages.

14 silver dimes equals 1 ounce of silver. So two weeks of work historically is 15 silver dimes which equals an ounce of silver.

500 ounces of silver multipled by 14 silver dimes equals 7,500 days wages or 20 years BUT it will most likely be 2-3x that when the pendulum swings back because there's much less silver available and billions more people on the planet.

Some asshole selling insurance making 200$/day can concert that to 15 ounces of silver a day which flies in the face of all economic reality.

The reason the UK currency is called Sterling is because - before speculative borrowing devalued it - a pound note could buy you a pound of sterling silver (92.5% purity).
The current price of sterling silver is approx £185.
The difference between these prices is inflation.

Even the gold and silver bugs on kitco are retarded. They think you need to buy 500k in silver to cover 500k in the bank.

Most of them actually think they are just preserving their wealth for when the dollar dies. But that makes zero sense. If you have 500k in silver and the dollar implodes and gas is 15$ a gallon and society starts getting real chaotic it isn't like you have your 500k invested in silver and you go about your life paying your 2k a month mortgage and showing up to the gas station and grocery store paying for things normally while society is melting down. And your 500k in silver lasts you 4-5 years.

What will happen is people will be destitute and that's when you take that 500 ounces of silver and buy a fucking apartment complex straight up no mortgage and after things get devalued usd wise you have people paying you rent and you live like a king.

So these gold and silver bugs with 10,000 ounces of silver thinking that it will equal 1,4 million in the former fiat paradigm are dumb as fuck and it will be a blessing in disguise for them because they will have fucking multi generational wealth

So this is why jp Morgan or whatever major bank has been gobbling up silver by the ass load. The debts going to pop and they'll be major players in the new money market. You have to have some timeline on when this happens. I'll say when we hit 25 trillion in debt and people see the straight up and down line of debt that's coming. So 3 years is my guess.

Silver and gold forums on kitco. Most are actually dumb like I said above but after scouring those forums in the past a good amount you will find some really smart guys explaining it.

Plus it's just critical thinking. Like I said above. The entire point of buying gold and silver is because fiat is a scam. When the dollar collapses your supposed be the beneficiary of a transfer of wealth. You aren't just supposed to stay even when everyone else is becoming destitute. It doesn't make logical sense.

Like the old story from Weimar Republic Germany where a hotel bellcap saved up 25 ounces of gold and after hyperinflation he was able to buy an entire city block with a measly 25 ounces of gold

>start reading all the blackmail the Jews are holding over the US

I wouldn't be surprised if the shadow government was exclusively jewish but I doubt it. People overestimate jews because of their over-representation. The reason for that is they live almost exclusive in cities and... they're Jewish, they're obsessed with money, they've been around long enough for evolutionary changes to occur to aid being Jewish. I bet if you scanned Jew brains they'd have some sort of unique circuitry for counting coins and they probably have some sort of hand dexterity related to coins from all those years they were about. Money is power.

Also 'muh IQ' this can literally be explained by cities as well. I wonder what would happen if you took the RURAL AND SUBURBAN RETARDS out and only counted white CITY PEOPLE and looked at the IQ. Seriously though people in the city are just more wealthy and are bound to have a higher than average IQ.

I'm guessing the shadow government is some kind of 'intellectual royalty' that believes only they are the ones capable of controlling mankind's destiny and uses a network of blackmailed pedophiles they collect from various cults they control. After being banned from twitter for trolling jews during the US election I guarantee most jews would not be allowed in the inner circle. They're mostly hysterical lolcows. https://www.youtube.com/watch?v=vIA5e_v3jNc That dumb bitch screaming "HITLAH HITLAH" is what they're really like. Just super neurotic persecution complex NPCs.

If the shadow gov is exclusively Jewish its not really their fault if they're mostly just normies who didn't know. It would be like blaming Italians for the mafia. But if it was proven they'd have to all be deported to Israel/Madagascar just to be safe.

Also no fucking way that the politicians we elect (that the shadow gov selects) have any power. The blackmailed ones get boosted the outsiders get smeared. Trump is probably the first president not to be blackmailed and selected by the CIA in a long time. He set up an image that was so effective at smear/dirt defense and countered even an extremely hard hitting dirt video (the pussy-grab one they held up their sleeve til the last minute) that would have torpedoed any other politician.

Most politicians that people think have tons of power are actually retarded. They're a certain kind of person, fastidious and hardworking and able to do their homework but clueless which is how they got camerasnared in the first place. Most are just pedos who only care about raping kids and are functioning mentally ill hence why so many of them seem unhinged and robotic when they try to act like regular people. All they have to do is follow orders and read from a script and they can continue to get donations and rape more kids.

Top western politicians are not smart enough to actually run a country and there's countless hours of video evidence of them talking as proof and you will see they're all rote educated but retarded and weird. Like that fucking Bush video where he talks about the precious fetus in the jar, Hillary spazzing out and malfunctioning and Theresa May acting like a robot.

A lot of my Jew friend were neurotic.

You obviously have different cliques in high school and it was always strange to me how different people from different cliques were so close when the groups overlapped at parties and such and realies later on it was because they were Jews. Even tho I didn't understand it at the time that the Jewish bond was so strong

I bet between 10-50k per ounce. Hugo salinas price the Mexican billionaire and owner of the equivalent of Walmart in Mexico had an incredible write up on it a couple years back in the coming gold revaluation. Google "Hugo salinas price gold revaluation." The last couple times I tried to find it i couldn't find it tho but maybe I just overlooked where it was when searching for it again. He lays it all out perfectly in why it has to happen.

But yes definitely exchange that ounce for silver.

Current silver to gold ratio is 80-1 when that narrows closer to historical norms of 16-1 that's when you exchange for gold and you get free ounces of gold.

So you'll have 100 ounce of silver wait till it goes down to 20 to 1 and swap for 5 ounces of gold.

There are actually scenarios where silver could be worth more than gold, just based on the fact it's industrial applications are thousands times. Lee than gold

Fun trivia.

Fort Knox the military base was in existence long before the United States Bullion Depository.
It's used for a lot more than just guarding gold.

The Depository was built in 1933 because they had run out of storage space due to FDR confiscating all the gold.

I'll be over here stacking up and printing out insurmountable amounts of future wealth.

Have fun being brainlets. Hopefully you keep your screenshot so you can look back on the day where truth was fed directly into your eyes with instructions on how to become rich in the next cycle. Yet you disregarded the greatest opportunity during the largest transfer of wealth in human history.

You will probably KYS when it happens and it's too late.

This, Plus Ultra, Q, /our guys/ in Fed and the troops have already won.

What we are witnessing is Light Yagami at the end of Death Note. The deep state desperately trying to regain power even as their evil is exposed and we have them cornered.

The next false flag will be something akin to Light turning and trying to write down names of all good guys.

As in next false flag will be deep state trying to kill /our guys/ one last time.

Which is why we have our advanced missle defenses ready (black budget electromagnetism craft) and our troops home in case Israel (only fully controlled deepstate asset with nukes left) tries to take the world down with them/cause HOT WW3 (COLD WW3 is here, information wars).

Some rumors going around about martial law too, all of what I have written is why. But do not fret, have faith when you look at our flag. The rest of the world does no matter how much they complain, and after this, they will be in our debt. We will charge them the bill, it will be paid with peace and prosperity without (((them))).

Like this faggot below.
